

SARGIS GEVORGYAN

Data Science · Quality Assurance · Entrepreneurship

+374 43 040427 | sargis_gevorgyan@edu.aua.am | Yerevan, Armenia | [linkedin.com/in/iznulaedinicu/](https://www.linkedin.com/in/iznulaedinicu/) | github.com/sxrgxs

PROFESSIONAL PROFILE

Driven Data Science student at the American University of Armenia with hands-on professional experience spanning quality assurance engineering, data governance, and entrepreneurial ventures. Combines strong technical depth in Python, Java, SQL, and test automation with a genuine curiosity for business problem-solving and data-driven decision-making. Proven ability to take initiative in professional environments, lead cross-functional teams, and challenge the status quo — demonstrated by independently executing QA tasks as an intern and leading a team project for AI syllabus development. Competitive programmer and academic high-achiever with a GPA of 3.974, seeking to apply analytical and leadership skills in high-impact business challenge competitions.

CORE COMPETENCIES

API Testing & QA Automation • Data Analysis & Visualization • Team Leadership
Python · Java · SQL · C++ • Business Problem-Solving • Agile & CI/CD Workflows
Entrepreneurship & E-Commerce • Competitive Programming • Analytical Reporting • Domain Driven Development

CAREER HIGHLIGHTS

- Achieved GPA of 3.974 at the American University of Armenia (BSDS); graduated Abovyan State College of Engineering with honors (Red Diploma), ranking among top students.
- Promoted to Team Lead at Near Protocol / Near AI, directing a 4-person team to build a complete 4th-grade mathematics syllabus dataset for AI training — delivered structured, validated content at scale.
- Independently executing API testing tasks at AmeriaBank as an intern through self-driven initiative, working alongside senior engineers in the Core Domain Services squad.
- Designed and piloted a peer-to-peer online game account trading network with a revenue-sharing model — an early entrepreneurial venture demonstrating systems thinking and commercial initiative.
- Competed in ICPC and multiple city-level programming and mathematics olympiads; earned certificates from AGBU, Yandex, and TON Foundation.

PROFESSIONAL EXPERIENCE

AmeriaBank | Yerevan, Armenia

Mar 2026 – Present

Quality Assurance Engineer Intern — Core Domain Services (CDS)

- Conduct manual and automated API testing for the bank's Core Domain Services layer, which handles all internal and external request routing across the organization.
- Develop and maintain automated test suites using Java, Maven, TestNG, and REST Assured, ensuring integration reliability across banking microservices.
- Perform code reviews, integration checks, and unit test validation in collaboration with senior engineers — contributing meaningfully beyond typical intern scope through self-driven initiative.
- Participate actively in QBRs, daily stand-ups, and cross-squad technical discussions, building strong foundations in corporate Agile workflows and professional collaboration.
- Advocated alongside the team for responsible productivity practices when tasked with granular self-reporting, demonstrating professional integrity and principled communication in a corporate context.

Near Protocol / Near AI | San Francisco, US (Remote)

May 2022 – Oct 2025

Data Governor / Collector · Team Lead

- Promoted to Team Lead, directing a dedicated project team to create a structured 4th-grade mathematics syllabus dataset for AI model training — overseeing scope, quality, and delivery timelines.
- Executed large-scale data collection and structuring operations using LaTeX to produce consistent, publication-ready datasets and analytical reports.
- Implemented quality control workflows to minimize validation errors and improve data consistency across deliverables, directly improving downstream model training outcomes.
- Identified and resolved technical bottlenecks in data collection tooling, reducing project delays and maintaining delivery velocity.
- Synthesized findings into comprehensive reports with actionable recommendations, supporting data-driven decision-making by project stakeholders.

Online B2C Sales | Yerevan, Armenia

Jul 2021 – May 2022

Self-Employed — E-Commerce & Digital Marketplace

- Launched and operated an online gaming account reselling business, applying digital marketing strategies to grow a customer base and maintain competitive pricing.
- Designed a peer-assisted revenue-sharing model to scale operations — piloting a distributed micro-entrepreneurship structure before pivoting to a leaner solo reselling approach.
- Managed supplier evaluation, customer communication, and live-chat support, achieving consistent customer satisfaction in a competitive digital marketplace.

Soriso | Yerevan, Armenia Mar 2020 – Sep 2021
Customer Service Representative

- Managed daily service operations ensuring optimal cross-departmental workflow while maintaining high client satisfaction standards.
- Handled client requests, resolved escalated issues, and analyzed customer feedback to surface actionable process improvements.

PROJECTS

Russian Real Estate Market Analysis | GitHub: github.com/sxrgxs 2024

- Built an end-to-end data analysis pipeline using Python (Pandas, Matplotlib, NumPy) to explore pricing trends, regional patterns, and market drivers in the Russian real estate sector.
- Produced visualizations and statistical insights demonstrating ability to extract business-relevant conclusions from large datasets.

Math Syllabus for AI (Near Protocol) | Team Lead 2022–2025

- Led a team to produce a validated, structured mathematics curriculum dataset used for AI model training — coordinating content design, quality review, and structured documentation.

EDUCATION

American University of Armenia | Yerevan, Armenia Aug 2025 – May 2029
Bachelor of Science — Data Science (BSDS) | GPA: 3.974

- Active member of EPIC, Acopian Center events, and student entrepreneurship and innovation communities.
- Participant in STRIVE entrepreneurial workshops focused on business model development and leadership.

Abovyan State College of Engineering | Abovyan, Armenia Sep 2021 – May 2025
Middle Professional — Programming Supply of Calculating Techniques

- Graduated with honors (Red Diploma) — ranked among the top students in the program.
- Actively participated in city-wide academic meetings and community events.

TECHNICAL SKILLS

Languages & Libraries: Python, Java, C++, JavaScript, R, SQL, LaTeX | NumPy, Pandas, Matplotlib, Pillow
QA & Testing: TestNG, REST Assured, pytest, Postman, Maven, REST API Testing, Code Review
Tools & Platforms: Git, Azure, Jira, CI/CD Pipelines, Agile/Scrum
Domains: Data Analysis, Data Visualization, Machine Learning (foundational), Software Test Automation

LANGUAGES

Armenian — Native | Russian — Native | English — C1 (TOEFL Certified)

ACCOMPLISHMENTS & CERTIFICATIONS

- Professional and volunteer certificates from AGBU, Yandex, and TON Foundation.
- Competed in ICPC and multiple programming and mathematics olympiads at academic and city level.
- Currently a sophomore BSDS student at AUA with GPA 3.974.
- Winner — Armenia TOP100 Students | Karapetyan Foundation
- Alumni — TechGen 1 | AmeriaBank
- English C1 (TOEFL Certification)
- SAT Math 790/800
